

DECLARATION FOR INTERACTIVE SOFTWARE

This function facilitates the declaration of interactive software (Eg. training, business, educational software, etc) and arcade video game machines that are not covered under the Video Games Classification System.

The service allows an importer to make a self-declaration that the contents of the software does not exceed the guidelines for interactive software (refer to annex).

Any content that exceeds the guidelines do not qualify for exemption and should not be declared.

Please note that this is a self-declaration system, and **no approval from IMDA will be issued for the declarations made.**
